### **DETAILED ACTION**

1. Claims 10-17 are pending in the present application.
2. Claims 1-9 and 18 have been canceled; and claims 10-17 have been amended.

### ***Specification***

3. The amendment filed July 12, 2004 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: "collected for rearrangement to degenerate identical values" this amendment is applied at page 18, line 27 [note page 4 of the response filed July 12, 2004].

Applicant is required to cancel the new matter in the reply to this Office Action.

### ***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 10-16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to

Art Unit: 2167

which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Regarding claims 10-16, the specification does not appear to describe the following limitation: "identical values of the values are degenerated." [note independent claim 10 line 9]. Applicant defines the newly added terminology on page 16 lines 1-8 of the response filed July 12, 2004; but does not appear to cite support for the newly added limitation within the specification. The original disclosure does not appear to discuss "*identical values*" or the term "*degenerated*". Applicant is reminded that consistency in terms is important for proper understanding of the invention.

***Allowable Subject Matter***

6. Claim 17 is allowed. The prior art of record fails to teach the combined limitations of this claim. Specifically the prior art does not teach "determining vertical direction positions on the map sheet by the first simple codes and horizontal direction position on the map sheet by the second simple codes in the acquisition order; arranging the specific items at positions where the vertical direction positions and the horizontal direction positions cross, and arranging the first simple codes on the left column opened by second simple code parallel arrangement means; and forming a matrix-like map sheet".

***Response to Arguments***

7. Applicant's arguments with respect to claims 10-16 have been considered but are moot in view of the new ground(s) of rejection. Applicant's amendment of claim 17 overcomes the rejection cited under 35 USC 112.

***Conclusion***

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
